

ACCESSORIES FOR DISPOSABLES

NIDHI[®] Meditech Systems
(Complete Urological Solutions Since-1995)

Nidhi Meditech System Provides genuine endo urological disposables like Double Pigtail Ureteral stent, Mono 'J' Stent, Endopylotomy stent, Ureteric catheters etc. All the endourological disposables manufactured & as per ISO 13485 : 2003 and CE 1023 standards.

All the products manufactured from tecoflex grade Polyurethanes according to ISO-10993 series

In general, the ease of processing and high strength of polyurethane makes them the material of choice in medical devices. Polyurethanes pass the tests of biocompatibility and chemical stability. They can be easily loaded with radiopaque material for X-ray detection. However, the major advantages of polyurethane are their thermolability that makes them very soft inside the body, minimizing the sense of discomfort associated with implantable foreign body. Nidhi double loop stent is made of tecoflex, which has the maximum degree of softening inside the body. It has a wide margin of durometer extending from very soft to very hard with different sizes and length according to the physician specification.

DOUBLE PIGTAIL URETERAL STENT

FEATURES

1. Durable with superior bio-compatibility
2. Thin wall (provides potency and good drainage).
3. Astraumatic insertion is revealed quite smooth.
4. Minimized tissue irritation with easy but rapid astraumatic insertion.
5. Cost effective.

URETERIC CATHETER

URETERIC CATHETER (OPEN END)

Application	Used for drainage as well as retrograde pyelogram by open end tip it is placed over a guide wire for negotiation to tortuous ureter.
Features	Smooth passage in tortuous ureter.
Use	For single use
Packing	Tyvek pouch as per EN-868-5-series standard
Sterilizations	With Ethylene Oxide EN-550 series standard
Packing Area	Class 100 as per ISO 14644-1

SINGLE STEP NOTTINGHAM DIALATOR

CE 1023

- Application :** Used to dilate the intramural tunnel and ureter in one step. May also be used to inject contrast medium to determine sub mucosal tunneling or anesthetic jelly to aid in dislodging ureteral stones
- Features**
- Smooth surfaces for ease of introduction.
 - Uniform taper to reduce trauma.
 - Used with 0.038" guide wire
- Size** 10 fr, 12 fr & 14 fr
- Length** 70 cm
- Use** For single use
- Packing** Tyvek pouch as per EN-868-5-series standard
- Sterilizations** With Ethylene Oxide EN-550 series standard
- Packing Area** Class 100 as per ISO 14644-1

FASCIAL DIALATORS SET (PCN)

- Application :** Used for fascial dilation of the ureter prior to ureteroscopy and / or stone manipulation
- Features**
- Smooth surfaces for ease of introduction.
 - Uniform taper to reduce trauma.
- Size** 6 fr, 16 fr
- Length** cm
- Use** For single use
- Packing** Tyvek pouch as per EN-868-5-series standard
- Sterilizations** With Ethylene Oxide EN-550 series standard
- Packing Area** Class 100 as per ISO 14644-1

URETERAL DIALATORS SET

- Application :** Used for dilation of ureter prior to uretero renoscopy and also for sequential (step by step) dilation of the intramural tunnel and ureter and / or stone manipulation.
- Features**
- Smooth surfaces for ease of introduction.
 - Uniform taper to reduce trauma.
- Size** 16 fr
- Length** 70 cm
- Use** For single use
- Packing** Tyvek pouch as per EN-868-5-series standard
- Sterilizations** With Ethylene Oxide EN-550 series standard
- Packing Area** Class 100 as per ISO 14644-1
